Cali, Valle del Cauca, Colombia

PROFESSIONAL PROFILE

Full Stack Developer with more than 4 years of experience in the design and implementation of robust technological solutions. I have worked with leading companies, specializing in backend development with .NET Core, web applications with React.js and enterprise solutions with Microsoft Power Platform. Creative and results-oriented, I know how to convert technical requirements into scalable solutions that optimize processes and improve user experience. With ability to work in multidisciplinary teams and under pressure.

EDUCATION

Systems Engineering | 2016 - 2021
Universidad Santiago de Cali

PROFESSIONAL EXPERIENCE

Developer | Universidad Santiago de Cali   *Colombia, Cali*
January 2019 – December 2020

- Designed and programmed all the video game logic in collaboration with an additional developer, including object physics, collision detection and complex game mechanics.
- Integrated virtual reality controls compatible with multiple devices and browsers, maximizing the accessibility of the video game.

Full stack semi senior developer | Intelecto SAS   *Colombia, Cali*
June 2021 – Present

- Developed complete web applications using .NET Framework and .NET Core as backend, integrated with React.js for responsive and dynamic user interfaces.
- Implemented database solutions in SQL Server, optimizing queries and designing schemas.
- Created multiplatform mobile applications with Xamarin for iOS and Android.
- Developed plugins and personalized scripts for CRM Dynamics 365 Online, automating business processes and improving productivity.
- Implemented automation solutions with Power Automate that reduced repetitive manual tasks.
- Designed interactive dashboards in Power BI for data analysis.
- Configured and personalized Power Pages and Power Apps to create web portals and enterprise applications.
- Administered and developed solutions in SharePoint Classic and Modern, improving collaboration and document management of multidisciplinary teams.
